The Dallas AHC Model
CREATING A WORLD OF CONNECTED COMMUNITIES WHERE EVERY HEALTH OUTCOME IS POSITIVE

MISSION: Reimagine and expand the knowledge base of healthcare through prescriptive analytics and artificial intelligence to deliver precision medicine.

Leading clinical expertise applying practical insights across the continuum of care

Prescriptive analytics and artificial intelligence driving personalized and precision medicine

Clinical Insights

Data Science Expertise

Innovation Framework

Innovation process and discipline, building breakthroughs and leading change
PCCI ECOSYSTEM

Non-profit, Innovation, Early Stage Advanced Analytics R&D Organization

For-profit, Technology and Advanced Analytics Company

One of the largest and most technologically advanced public health systems in the world serving a very diverse and vulnerable population.
OUR TEAM

CLINICAL EXPERTISE
11 MDs/PhDs/MBA/MS

Epidemiology, oncology, primary care, health economics, informatics, public health, chronic care delivery design and evaluation, pediatrics, and health services research.

DATA SCIENCE
9 PhDs/MD/MS

50+ years experience
Advanced Analytics, NLP, predictive modeling, AI, ML, NoSQL, R, Python

AGILE  DESIGN THINKING  INNOVATION  COLLABORATION

ADVANCED DATA ARCHITECTURE & PLATFORM
Background and Summary

- Accountable Health Communities (AHC) is a 5-year CMMI Model that launched on May 1st, 2017
- Designed to improve the health of our community and reduce the cost and utilization of unnecessary care.
- 32 organizations around the country participate in this effort
- Expected outcomes include reduction of ED utilization, readmissions, unnecessary hospital admissions
- We believe the Model is a precursor to new payment models where part of the cost savings are shared with the community benefit partners to support the comprehensive care of patients
- Dallas AHC has a goal of screening 75,000 and navigating 2,925 navigated beneficiaries per year (annual goal)
National Attention on the Dallas AHC and PCCI

- CMS has launched the Cross Model Learning Network - a platform to foster collaboration and learning among participants of all CMMI Models
- PCCI was invited to share its experience and insights on building Connected Communities of Care in Dallas
